Grant Writing

- Researching of Local/State/Federal Grant Opportunities
- Grant Application Submittals
- Documentation/Payment Request Submittals

MDES, Inc. has been involved with and completed projects that have been grants or loan funded projects through the State of Illinois. In most cases we have prepared the grant paperwork, conducted presentations for the community at the State level and administered the documents upon approval of the project.

The administration typically involved the monthly submittal of the project status report, financial report and all the supporting documents required by the particular agency. We also have completed the closeout paperwork that documented final costs, as built information, contractor verifications and other information required by the agency to fulfill the grant contract. We understand the importance for communities, both big and small, to secure funding for projects through alternative sources. We will explore all avenues and utilize all available resources to find your community funding.
